

Running out of Space: Running out of Time?

Gail Boyle BA FSA Bristol Museums, Galleries & Archives Chair: Society for Museum Archaeology

ARCHAEOLOGICAL ARCHIVES AND MUSEUMS 2012

Rachel Edwards Society of Museum Archaeologists

Society of Museum Archaeologists

The project:

- to report on the current position of archaeological archive collecting in England
- to update the map and database of museum collecting areas
- to investigate the use, storage, and curation of archaeological archives in museums
- to assess the provision of specialist expertise

Museums

161 museums surveyed:

134 responses

Contractors

100 + organisations consulted:

46 responses

http://archaeologydataservice.ac.uk/archives/view/sma_map/map.cfm

Map – Vital Statistics

- Iinks to the 151 museums whether accepting or not, plus contact information
- 120 able to collect but only 84 without conditions
- 47 local authority areas with no current collecting body for archives

Specialist Staff

Only 30% of the museums that replied had a curator of archaeology or equivalent – many reported staff lost as the consequences of local authority budget cuts

	No of museums	No of local authorities	% of local authorities
Archaeology curator	53	177	54%
No curator of archaeology	71	81	25%
Not known whether or not there is a curator of archaeology	35	35	11%
No museum	-	33	10%
Total	159	326	100%

Space

On average archaeological collections occupy 22% of space available in museum stores – local history occupies double this amount

Uses

More museums appeared to use archaeological collections for loans, teaching collections, and handling packs than other types of collections.

Visits

40 museums reported a collective total of over 2000 visits to see archaeological material in store in one year alone

Projects & Audiences

Archaeological collections, including archives, have been used by respondents to reach a very wide and diverse range of audiences.

Discovery day: Archaeological experts, Kate Iles, Penny Spackman, Tony Roberts, Ed Renshaw, Chris Mowlem, show off Roman items in Sea Mills, the location of the small Roman town and port Abona around 2,000 years ago

Roman tales at

AN ARCHAEOLOGICAL event took place in Sea Mills

The discovery day was organised after a series of investigations were carried out by local volunteers with the help of Bristol City Council's archaeological and museum

The project included door-to-door surveys and small-scale archaeological digs in people's gardens.

Experts then presented the findings to explain how Sea Mills was once the location of Abona, a small Roman town and port nearly 2,000 years ago. They also identified archaeological finds and demonstrated techniques such as geophysical surveying that were used during the project.

Archives with Units

9,000 un-depositable archaeological archives in England. The estimated volume of un-depositable archives was 1,160m³. The figures indicated an estimated national storage cost of £330,000 annually.

AAF The Archaeological Archives Forum invites you to an open meeting to discuss the recommendations in

ARCHAEOLOGICAL ARCHIVES AND MUSEUMS 2012

Thursday 7th March 2013

The Dickens Room, Birmingham and Midland Institute Margaret Street, Birmingham, B3 3BS

Society of Museum Archaeologists

8 Recommendations:

1 Produce a policy statement on the significance of archaeological archives nationally, and their importance as a key resource in the future.

2 Promote the potential of archaeological archives as a resource for engaging all communities.

3 Establish a national strategy for archive completion as a means of providing easy access to the archaeological record.

4 Develop a national strategy for the storage and curation of archaeological archives.

5 Ensure that the significance of archives is fully recognised at all stages of planning-led archaeological work.

6 Seek solutions for archive material that currently cannot be transferred to a repository.

7 Develop a framework for the provision of archaeological archive advice to practitioners in planning authorities, contracting organisations, museums, and community groups.

8 Promote and publicise the collecting areas map.
